 Help & Tips

How to use this tool:

1. **Keywords:** Enter the job title, skills, or keywords you're looking for
2. **Location:** Specify where you want to work (city, state, or "Remote")
3. **Time Filter:** Choose how recent the job postings should be
4. **Advanced Filters:** Narrow down by experience level, job type, and work arrangement

Pro Tips:

- Use specific keywords for better results (e.g., "Senior Python Developer" vs "Developer")
- For remote work, try both location="Remote" and selecting "Remote" in work arrangements
- Shorter time filters (1-4 hours) help you catch new postings quickly
- Sort by "Most Recent" when using short time filters
- Use multiple experience levels if you're open to different seniority levels

Time Filter Shortcuts:

- **1 hour:** Perfect for frequent checking throughout the day
- **4-8 hours:** Good for checking twice daily
- **24 hours:** Daily job hunting routine
- **1 week:** Weekly comprehensive search

URL Parameters Explained:

The generated URL contains parameters that control the search:

- `keywords` : Your search terms
- `location` : Geographic location
- `f_TPR` : Time filter (r3600 = 1 hour, r86400 = 24 hours)
- `distance` : Search radius in miles
- `sortBy` : Sorting method (DD = date, R = relevance)
